

Regular Expressions

Summary of regular-expression constructs

Characters

<code>x</code>	The character <code>x</code>
<code>\\</code>	The backslash character
<code>\0n</code>	The character with octal value <code>0n</code> ($0 \leq n \leq 7$)
<code>\0nn</code>	The character with octal value <code>0nn</code> ($0 \leq n \leq 7$)
<code>\0mnn</code>	The character with octal value <code>0mnn</code> ($0 \leq m \leq 3, 0 \leq n \leq 7$)
<code>\xhh</code>	The character with hexadecimal value <code>0xhh</code>
<code>\uhhhh</code>	The character with hexadecimal value <code>0xhhhh</code>
<code>\t</code>	The tab character (<code>\u0009</code>)
<code>\n</code>	The newline (line feed) character (<code>\u000A</code>)
<code>\r</code>	The carriage-return character (<code>\u000D</code>)
<code>\f</code>	The form-feed character (<code>\u000C</code>)
<code>\a</code>	The alert (bell) character (<code>\u0007</code>)
<code>\e</code>	The escape character (<code>\u001B</code>)
<code>\cx</code>	The control character corresponding to <code>x</code>

Character classes

<code>[abc]</code>	a, b, or c (simple class)
<code>[^abc]</code>	Any character except a, b, or c (negation)
<code>[a-zA-Z]</code>	a through z or A through Z, inclusive (range)
<code>[a-d[m-p]]</code>	a through d, or m through p: <code>[a-dm-p]</code> (union)
<code>[a-z&&[def]]</code>	d, e, or f (intersection)
<code>[a-z&&[^bc]]</code>	a through z, except for b and c: <code>[ad-z]</code> (subtraction)
<code>[a-z&&[^m-p]]</code>	a through z, and not m through p: <code>[a-lq-z]</code> (subtraction)

Predefined character classes

<code>.</code>	Any character (may or may not match line terminators)
<code>\d</code>	A digit: <code>[0-9]</code>
<code>\D</code>	A non-digit: <code>^[^0-9]</code>
<code>\s</code>	A whitespace character: <code>[\t\n\x0B\f\r]</code>
<code>\S</code>	A non-whitespace character: <code>[^\s]</code>
<code>\w</code>	A word character: <code>[a-zA-Z_0-9]</code>
<code>\W</code>	A non-word character: <code>[^\w]</code>

Boundary matchers

<code>^</code>	The beginning of a line
----------------	-------------------------

\$	The end of a line
\b	A word boundary
\B	A non-word boundary
\A	The beginning of the input
\G	The end of the previous match
\z	The end of the input

Greedy quantifiers

$X?$	X , once or not at all
X^*	X , zero or more times
X^+	X , one or more times
$X\{n\}$	X , exactly n times
$X\{n, \}$	X , at least n times
$X\{n, m\}$	X , at least n but not more than m times

Reluctant quantifiers

$X??$	X , once or not at all
$X^*?$	X , zero or more times
$X+?$	X , one or more times
$X\{n\}?$	X , exactly n times
$X\{n, \}?$	X , at least n times
$X\{n, m\}?$	X , at least n but not more than m times

Possessive quantifiers

$X?+$	X , once or not at all
X^*+	X , zero or more times
X^{++}	X , one or more times
$X\{n\}+$	X , exactly n times
$X\{n, \}+$	X , at least n times
$X\{n, m\}+$	X , at least n but not more than m times

Logical operators

XY	X followed by Y
$X Y$	Either X or Y
(X)	X , as a capturing group

Back references

$\backslash n$	Whatever the n^{th} capturing group matched
----------------	--

Quotation

\	Nothing, but quotes the following character
\Q	Nothing, but quotes all characters until \E
\E	Nothing, but ends quoting started by \Q

Special constructs (non-capturing)

(?:X)	X, as a non-capturing group
(?idmsux-idmsux)	Nothing, but turns match flags i d m s u x on - off
(?idmsux-idmsux:X)	X, as a non-capturing group with the given flags i d m s u x on - off
(?=X)	X, via zero-width positive lookahead
(?!X)	X, via zero-width negative lookahead
(?<=X)	X, via zero-width positive lookbehind
(?<!X)	X, via zero-width negative lookbehind
(?>X)	X, as an independent, non-capturing group

Backslashes, escapes, and quoting

Line terminators

A *line terminator* is a one- or two-character sequence that marks the end of a line of the input character sequence. The following are recognized as line terminators:

- A newline (line feed) character ('\n'),
- A carriage-return character followed immediately by a newline character ("\r\n"),
- A standalone carriage-return character ('\r'),
- A next-line character ('\u0085'),
- A line-separator character ('\u2028'), or
- A paragraph-separator character ('\u2029').
